

EARLY YEARS PLAYGROUND WATER WALL

PT-SP-0002

The Early Years Playground Water Wall is particularly beneficial in settings where space is at a premium. It provides a hands-on, interactive element to your learning environment, enabling children to explore and learn through play. This water wall invites children to pour water and observe its movement as it travels through various components of the wall. The water wall also features a pump and a timber trough, circulating water throughout the structure. They can watch in fascination as the water cascades down different sections, and fills up the transparent domes, offering endless opportunities for discovery.

Features a water pump and timber trough!

All our timbers are pressure-treated with a chrome-free and arsenic-free preservative which protects against decay and insect attack. Each piece is sanded to create a smooth finish.

HDPE sheets are thermoplastic materials that are used in many of our products. The versatile properties, including UV stability, make it resistant to fading, moisture, weather, stain and graffiti.

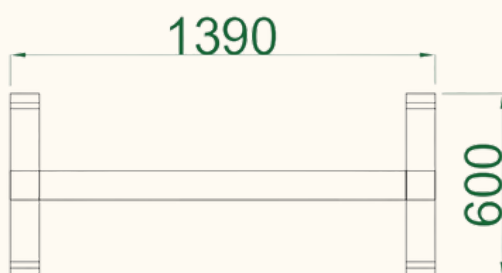

Polycarbonate is a durable, lightweight plastic known for its optical clarity and high impact resistance, making it an ideal choice for applications requiring safety and durability.
