

FLOOR LADDER

PT-AP-0024

The floor ladders are an interactive and exciting addition to any playground when introducing free-standing, balancing obstacles into your area. This product is fantastic for improving children's muscle development, balance, stability and their core strength whilst enhancing their confidence and concentration. Children can utilise the evenly spaced, static low-level steps, as they teeter their way through the playground, pretending the floor is lava!

This product is not to be used vertically.

All our timbers are pressure-treated with a chrome-free and arsenic-free preservative which protects against decay and insect attack. Each piece is sanded to create a smooth finish.

18mm thick, anti-slip mesh phenolic birch plywood sheets are fitted to reduce the risk of slips and falls.

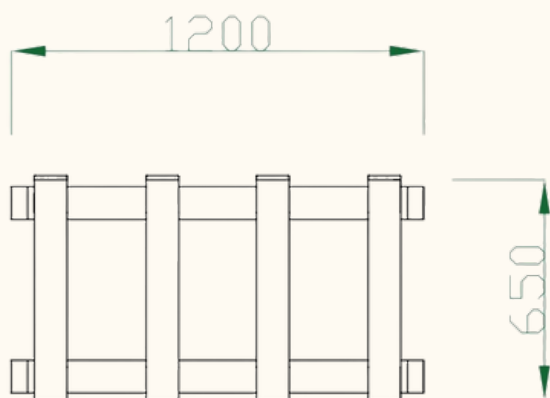

HDPE sheets are thermoplastic materials that are used in many of our products. The versatile properties, including UV stability, make it resistant to fading, moisture, weather, stain and graffiti.
