

OUTDOOR NATURE INSECTS WORMERY HIDE

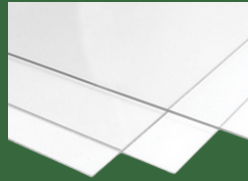

PT-SP-0020

The Outdoor Nature Insects Wormery Hide is an innovative composting system that harnesses the natural decomposition abilities of worms to convert organic matter into nutrient-rich compost. This sustainable and eco-friendly system is designed to efficiently process food scraps, garden waste, and other organic materials, transforming them into a valuable resource that enriches soil quality and promotes healthy plant growth. Beyond its practical composting function, the Outdoor Nature Insects Wormery Hide serves as an educational and interactive feature, making it ideal for outdoor environments like playgrounds, parks, and community gardens.

All our timbers are pressure-treated with a chrome-free and arsenic-free preservative which protects against decay and insect attack. Each piece is sanded to create a smooth finish.

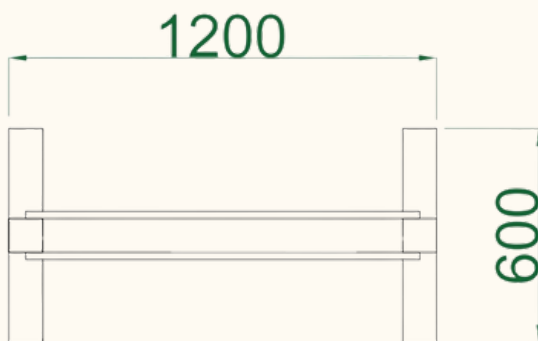

Polycarbonate is a durable, lightweight plastic known for its optical clarity and high impact resistance, making it an ideal choice for applications requiring safety and durability.
