

EARLY YEARS MOVABLE PHYSICAL WATER WALL

PT-SP-0003

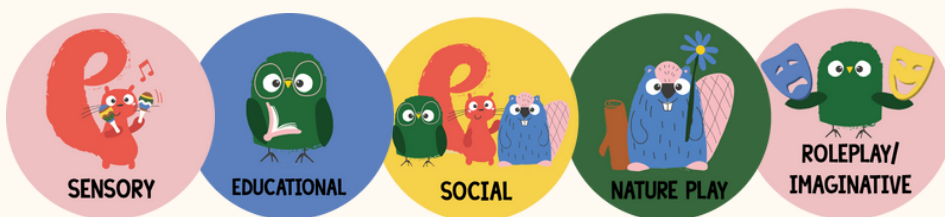

The Early Years Movable Physical Water wall is a versatile and interactive play structure designed to captivate children's imaginations while fostering their cognitive and motor skills! This engaging apparatus consists of numerous holes into which children can insert the timber channels at various angles. As children experiment with the placement of channels and water trays, they engage in hands-on learning that introduces them to fundamental principles of physics, such as gravity and the behaviour of water or sand. By arranging the pegs and components in different configurations, children can create pathways for water to flow, observing how altering the angles or positions of the elements changes the speed and direction of the flow.

**Encourages
sensory play!**

All our timbers are pressure-treated with a chrome-free and arsenic-free preservative which protects against decay and insect attack. Each piece is sanded to create a smooth finish.

HDPE sheets are thermoplastic materials that are used in many of our products. The versatile properties, including UV stability, make it resistant to fading, moisture, weather, stain and graffiti.
